MAPTIMIZE Serial: 77725870	Abandoned Abandon: 01/29/2010 Filed: 04/30/2009	009 accounting software for use in the construction industry for contract bidding and job accounting; an optical metrology inspection system comprised of a light source, one or more cameras and sensors in communication with computer software and hardware; anti-spyware software; automated debris management system software for use in cleaning up after major disasters; automated microscope and operating software sold as a unit for use in laboratory operations; automated process control system, namely, micro-processor based hardware and software used to monitor the status of industrial machinery, namely, turbines, generators and compressors; automated process control system, namely, micro-processor based hardware and software used to monitor the status of industrial processes, namely, power generation, electrical distribution and oil and gas processing; automated systems, namely, software, hardware and communications devices for planning, scheduling, controlling, monitoring and providing information on transportation assets and parts thereof; broadband power line communication systems for transferring broadband data over electrical power lines, comprised of computer hardware, software and modems; building security systems comprising software and hardware for providing picture, video, alarm status, building plans, and other information to a remote station; children's educational software; communication software for providing access to the internet; communication software to access data stored on an oximeter and transfer data to another device; communications software for connecting online maps; compiler software; components for gaming machines, namely, controllers, displays, button panels, bolsters, electrical wiring, and computer hardware and software associated therewith; computer anti-virus software; computer application software for mobile phones; computer communications software to allow customers to access bank account information and transact bank business; computer database management software for use in personalizing the content of e-mail communications; computer e-commerce software to allow users to perform electronic business transactions via a global computer network; computer game software; computer game software focusing on achieving a set of goals, positions, ownership, and credentials, and professional and social status, and good fortune necessary to succeed professionally and personally, and not referring either to a group of software for use in commerce or to a group of offices; computer game software for gaming machines including slot machines or video lottery terminals; computer game software for gaming	Sebastien Gruhier 85 rue de la chalois cesson sevigné FR	

machines, namely, slot machines and video lottery terminals; computer game software for personal computers and home video game consoles; computer game software for use with personal computers, home video game consoles used with televisions, and for arcade-based video game consoles; computer game software, namely, a computer craps game; computer graphics software; computer hardware and computer software for retail inventory management, sold as a unit; computer hardware and computer software programs for the integration of text, audio, graphics, still images and moving pictures into an interactive delivery for multimedia applications; computer hardware and software for processing digital music files; computer hardware and software for setting up and configuring local area networks; computer hardware and software for setting up and configuring wide area networks; computer hardware and software sold as a unit for testing of embedded computer systems; computer hardware and software system for remotely monitoring environmental conditions and controlling devices within a building, facility, grounds, or designated spatial area; computer hardware and software system for tracking people, objects and pets using gps data on a device on the tracked people, objects and pets; computer hardware and software used for the control of voice controlled information and communication devices; computer hardware and software, for use with medical patient monitoring equipment, for receiving, processing, transmitting and displaying data; computer processing software to process the image colors with the color and intensity and interpret the results as tendencies of the organs, glands and tissues according to the iridology charts; computer programs recorded on data media (software) designed for use in construction and automated manufacturing (cad/cam); computer screen saver software; computer search engine software; computer software and computer hardware for use in language localization, by means of language translation, subtitling, dubbing, closed captioning and teletext for feature films, television programs, videos and digital media in general; computer software and firmware for games of chance on any computerized platform, including dedicated gaming consoles, video based slot machines, reel based slot machines, and video lottery terminals; computer software and hardware for disseminating advertising for others on employee earnings and third party paper payroll stubs and checks and on electronic payroll payments; computer software and hardware for online maps; computer software development tools; computer software featuring musical sound recordings and musical video recordings; computer software for accessing information directories that may be downloaded from the global computer network; computer software for administration of computer local area networks; computer software for administration of computer networks; computer software for application and database integration; computer software for communicating with users of hand-held computers; computer software for computer system and application development, deployment and management; computer software for controlling and managing access server applications; computer software for controlling and managing patient medical information; computer software for controlling self-service terminals; computer software for creating searchable databases of information and data; computer software for encryption; computer software for interpretation of neuro and brain scans provided by diagnostic imaging equipment; computer software for manipulating digital audio information for use in audio media applications; computer software for organizing and viewing digital images and photographs; computer software for processing digital music files; computer software for providing an on-line database in the field of transaction processing to upload transactional data, provide statistical analysis, and produce notifications and reports; computer software for pulmonary, cardiovascular and edema analysis

for use in small animal research studies; computer software for redistricting, namely, aggregating smaller geographical areas into multiple larger areas; computer software for scientific analysis of genetic sequences; computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; computer software for the creation of firewalls; computer software for the databasing, visualization, manipulation, virtual reality immersion and integration of geographic information with on-line member communities; computer software for the field of warehousing and distribution, to manage transactional data, provide statistical analysis, and produce notifications and reports; computer software for the management of commercial printing companies in the field of cost estimating, production planning, scheduling production, binding, shipping and analysis of the printing job; computer software for use in customer relationship management (crm); computer software for use in programming facsimile machines; computer software for use in relation to digital animation and special effects of images; computer software for use in the encryption and decryption of digital files, including audio, video, text, binary, still images, graphics and multimedia files; computer software for use in the safeguarding of digital files, including audio, video, text, binary, still images, graphics and multimedia files; computer software for visualization in the nature of graphical representation and analysis of satellites; computer software for wireless content delivery; computer software for online maps; computer software for online maps that may be downloaded from a global computer network; computer software platforms for online maps; computer software that allows people or organizations to create a voting event, vote on the issue, change their vote at will and track the input and display it in a unique graphical way; computer software that assists computers in deploying parallel applications and performing parallel computations; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface; computer software that provides web-based access to applications and services through a web operating system or portal interface; computer software to automate data warehousing; computer software to control and improve computer and audio equipment sound quality; computer software to enable the transmission of photographs to mobile telephones; computer software to enhance the audio-visual capabilities of multimedia applications, namely, for the integration of text, audio, graphics, still images and moving pictures; computer software to monitor and control factory manufacturing processes; computer software, namely, an application allowing sales and field service employees to update and receive data stored in an enterprise's computer databases in real time, using a mobile device, with full telephony integration with the telephone and/or software features of the mobile device; computer software, namely, electronic financial platform that accommodates multiple types of payment and debt transactions in an integrated mobile phone, pda, and web based environment; computer software, namely, game engine software for video game development and operation; computer software, namely, software development tools for the creation of mobile internet applications and client interfaces; computer telephony software; credit screening software; data compression software; database management software for online maps; day and night vision systems primarily comprising day and night sensors, day and night cameras, power sources, communication means, monitors and operating software; decoder software; desktop publishing software; digital telephone platforms and software; digital trading cards in the nature of multimedia software recorded on magnetic media featuring online maps; downloadable computer software for online maps;

downloadable computer software in the field of memory training activities sold as a unit with positionable figures; downloadable electronic data files and databases, namely, business and tax forms, for use with computer software; downloadable software for online maps; educational software featuring instruction in online maps; electrical energy utilization metering devices complete with related software; electrical leak detection hardware and operating software; electronic game software; electronic game software for cellular telephones; electronic game software for handheld electronic devices; electronic game software for wireless devices; electronic game software, namely, an electronic craps game; electronic game software, namely, an electronic video craps game; electronic software updates, namely, downloadable computer software and associated data files for updating computer software in the fields of online maps, provided via computer and communication networks; electronic test instrument and associated software for use in leak, flow and functional testing; elevator performance monitoring system, namely, embedded software in controllers for monitoring elevator functions; enterprise software in the nature of a database for non-transactional data and a search engine for database content; environmentally friendly automation systems, namely, embedded operating systems and pc based software, for monitoring specified conditions and controlling respective innovative devices within a designated area; facilities management software, namely, software to control building environment, access and security systems; factory automation software, namely, software to integrate manufacturing machine operations, track problems and generate production reports; floppy discs for computers featuring online maps; free-space optics transmission systems, ethernet switches and routers, and software sold both as components thereof and separately, namely, software adapted and arranged for operating, installing, testing, diagnosing and managing the forgoing telecommunication equipment; game software; gaming software that generates or displays wager outcomes of gaming machines; global positioning system (gps) consisting of computers, computer software, transmitters, receivers, and network interface devices; graphical user interface software; hardware and software adapter for coupling a gps receiver to the microphone input of a digital camcorder; home and office automation systems comprising wireless and wired controllers, controlled devices, and software for lighting, hvac, security, safety and other home and office monitoring and control applications; industrial process control software; industrial processed control software for generating computer readable markings for application to board lumber; integrated battery backup systems comprising a battery, an electronic measurement apparatus for use in the measurement of battery health and performance, and a remote computer software program that uses the foregoing data to trend, predict, and store data related to the health of the battery; integrated circuit chips for online maps as a component of video games software; integrated suite of global tax management software; interactive computer kiosks comprising computers, computer hardware, computer peripherals, and computer operating software, for use in online maps; interactive multimedia software featuring audio and video information for patients on the subject of treatments, procedures and alternatives related to dentistry; interactive video games of virtual reality comprised of computer hardware and software; lan (local area network) operating software; lighting control software for use in commercial and industrial facilities; medical imaging software that records, monitors and analyzes data using a catheter based ultrasound imaging probe; medical research equipment, namely, computers, gamma cameras, collimators, aperture plates and computer software, all sold together as a unit for use in high resolution, high sensitivity tomographic image processing and imaging

in the field of nuclear medicine; medical software for processing and displaying breast images on medical resonance imaging machines (mri's); medical software for processing and displaying images on ultrasound medical imaging machines; medical software for online maps; medical workstation comprised of computer hardware and software for gathering and transmitting patient image data for use during surgical procedures; multimedia software recorded on cd-rom featuring online maps; music-composition software; network access server operating software; operating and user instructions stored in digital form for computers and computer software, in particular on floppy disks or cd-rom; optical discs containing software and programming, used to set-up and calibrate televisions and video output devices; pattern recognition systems composed of computer chips, computer hardware and software; pipeline communication systems for transferring data over oil, gas, water and heat distribution pipeline networks, comprised of computer hardware, software, modems and communication cables; scientific apparatus for use with membrane filtration, namely, water filter controllers and computer software for detecting and measuring water quality; software defined radio; software for configuring, quoting and ordering electrical distribution products; software for dosimetry purposes in the field of radiotherapy; software for ensuring the security of electronic mail; software for medical imaging equipment, namely, for interpreting the results of ct scanners; software for monitoring and controlling communication between computers and automated machine systems; software for optical character recognition; software for processing digital images of the anatomy for diagnosis and treatment; software for processing images, graphics and text; software for the operational management of portable magnetic and electronic cards; software programmable microprocessors; software to control and improve audio equipment sound quality; software utilizing bidirectional communication via ethernet and internet to monitor and/or configure programmable logic controls for wine cellars; tax management data collection software; tax management software; telecommunications equipment; fiber-optic transceivers; fiber optic repeaters; converters; optimizers; wave division multiplexers; free-space optics transmission systems; switches including ethernet switches; routers; fiber-to-the-home; ethernet-over-vdsl access aggregators; terminators; repeaters; switches; console; alarm; sensor; power management devices; telecommunications hardware and software for monitoring and alerting remote sensor status via the internet; turbine control systems comprising electronic sensors and related software; ultrasonic bone densitometer with computer, printer, and computer software for use therewith, sold as a unit, for scientific use; upi (universal peripheral interface) software; usb (universal serial bus) operating software; video game software; video game software, namely, a video craps game; virtual reality game software; virtual reality software for online maps; vpn (virtual private network) operating software; wan (wide area network) operating software; web site development software; wireless communication device featuring voice, data and image transmission including voice, text and picture messaging, a video and still image camera, also functional to purchase music, games, video and software applications over the air for downloading to the device

016 blank paper computer tapes; blank paper computer tapes for recording programs; blank paper tapes and cards for the recording of computer programs; computer game instruction manuals; computer manuals for online maps; computer paper; computer printer ink ribbons; computer printer ribbons; computer program manuals for online maps; computer ribbons; diagrams for online maps; magazines featuring online maps; non-magnetically encoded prepaid purchase cards for online maps; photographs that have been

computer manipulated and enhanced to look like paintings; series of computer game hint books; software programmes and data processing programmes in printed form

038 broadcasting programs via a global computer network; communication by electronic computer terminals; communication services, namely, electronic transmission of data and documents among users of computers; communication via analogue and digital computer terminals; communication via computer terminals, by digital transmission or by satellite; communications by computer terminals; communications via analogue and digital computer terminals; computer aided transmission of information and images; computer services, namely, providing on-line facilities for real-time interaction with other computer users concerning topics of general interest; computer transmission of information accessed via a code or a terminal; computer-aided transmission of messages; electronic delivery of images and photographs via a global computer network; electronic transmission of data and documents via computer terminals; electronic transmission of data and documents via computer terminals and electronic devices; on-line document delivery via a global computer network; providing a high speed access to area networks and a global computer information network; providing electronic transmission of credit card transaction data and electronic payment data via a global computer network; providing multiple use access to global computer information networks for the transfer and dissemination of a wide range of information; providing multiple user access to proprietary collections of information by means of global computer information networks; providing multiple-user access to a global computer information network; providing on-line chat rooms for transmission of messages among computer users concerning online maps; providing on-line electronic bulletin boards for transmission of messages among computer users concerning online maps; providing on-line forums for transmission of messages among computer users concerning online maps; providing on-line listservers for transmission of messages among computer users concerning online maps; providing private and secure real time electronic communication over a computer network; providing telecommunication access to libraries related to the management of electronic journals and similar materials in a manner appropriate for loading and automatically updating their local computer systems used for managing electronic resources; providing telecommunications connections to a global computer network; providing user access to a global computer network; provision of access to a global computer network; rental of access time to global computer networks; rental of teleprocessing and computer communication apparatus and instruments; streaming of audio, visual and audiovisual material via a global computer network; transmission and distribution of data or audio visual images via a global computer network or the internet; transmission of information via computers connected to the same telematic network

042 advisory services in the field of product development and quality improvement of software; application service provider (asp) featuring software for use online maps; application service provider (asp), namely, hosting computer software applications of others; application service provider featuring software for providing an on-line database in the field of transaction processing to upload transactional data, provide statistical analysis, and produce notifications and reports; application service provider, namely, providing, hosting, managing, developing, and maintaining applications, software, web sites, and databases in the fields of personal productivity, wireless communication, mobile information access, and remote data management for wireless delivery of content to handheld computers, laptops and mobile electronic devices; application service provider,

namely, providing, hosting, managing, developing, researching, analyzing, reporting, and maintaining applications, software, web sites, and databases of others in the fields of healthcare, benefits programs, employee productivity, risk management; automotive diagnostic services featuring computer software for use by independent automotive repair personnel; computer and computer software rental; computer hardware and software consulting services; computer monitoring service which tracks application software performance, performs periodic maintenance and provides reports and alerts concerning such performance; computer network design and computer software design for the online maps; computer programming and software design; computer service, acting as an application service provider in the field of knowledge management to host computer application software for creating searchable databases of information and data to allow users to perform, on-line, the collecting and analyzing of different types of opinion surveys; computer service, namely, acting as an application service provider in the field of knowledge management to host computer application software for creating searchable databases of information and data; computer service, namely, acting as an application service provider in the field of knowledge management to host computer application software for searching and retrieving information from databases and computer networks; computer service, namely, acting as an application service provider in the field of knowledge management to host computer application software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; computer services, namely, providing a web-based system and online portal for customers to remotely manage, administer, modify and control their end user computer devices, data and software applications; computer software consultancy; computer software consultation; computer software design; computer software design for others; computer software design, computer programming, or maintenance of computer software; computer software development; computer software development and computer programming development for others; computer software development in the field of freight transportation by truck, rail, air and ocean; computer software development in the field of mobile applications; computer software installation and maintenance; computer software rental; consultancy in the field of software design; consultation services in the fields of selection, implementation and use of computer hardware and software systems for others; consulting services in the field of design, selection, implementation and use of computer hardware and software systems for others; consulting services, namely, designing, creating, implementing and maintaining computer software for owners, managers and other personnel to set-up, open, operate and manage a commercial climbing facility; customization of computer hardware and software; customized software development services; data automation and collection service using proprietary software to evaluate, analyze and collect service data; debugging computer software for others; design and development of computer game software and virtual reality software; design and development of computer hardware and software; design and development of computer software; design and development of computer software for the improvements of purchasing functions of business; design and development of integrated data collection and wireless transmission hardware systems for equipment and for software applications associated with that equipment at mining, construction, and industrial sites; design and development of on-line computer software systems; design and implementation of software and technology solutions for the purpose of product and document authentication and tracking, and brand monitoring and protection, to protect against counterfeiting, tampering, and diversion, and to

ensure the integrity of genuine products and documents; design for others in the field of computer networks, software, and engineering for the online maps; design of computer hardware, integrated circuits, communications hardware and software and computer networks for others; design of computer networks and software for others for the online maps; design of computer programs and software relating to aircraft; design of home pages, computer software and web sites; design, development and implementation of software; design, development, and consulting services in the field of home and workplace automation hardware and software; design, maintenance, development and updating of computer software; design, updating and rental of computer software; design, upgrading and rental of computer software; designing and developing computer game software and video game software for use with computers, video game program systems and computer networks; designing computer software for controlling self-service terminals; developing and updating computer software; developing computer software; developing of driver and operating system software; development of computer programs recorded on data media (software) designed for use in construction and automated manufacturing (cad/cam); development of customized software for others for use in risk assessment, information security, business analysis, audit and audit planning, and sales management; development of software for secure network operations; development, updating and maintenance of software and data bases; image processing software design; inserting software protection programs and security programs onto magnetic media; installation and maintenance of computer software; installation of computer software; installation, maintenance and repair of computer software; installation, repair and maintenance of computer software; maintenance and updating of computer software; maintenance and upgrading of computer software; maintenance of computer software; maintenance of computer software used for operating filling apparatus and machines; maintenance of software for internet access; periodic upgrading of computer software for others; programming of computer software for others; providing a web site featuring software that enables shippers of freight using truck, rail, ocean or air transportation to select routes and carriers, to communicate with carriers, and to manage pickup and delivery of shipments; providing a web site featuring temporary use of non-downloadable software allowing web site users to upload on-line videos for sharing with others for entertainment purposes; providing a web site featuring temporary use of non-downloadable software allowing web site users to upload, post and display online videos for sharing with others for entertainment purposes; providing a website featuring on-line non-downloadable software that enables users to create audio drama series and episodes, write scripts, audition and assign talent, record and mix audio, publish produced audio dramas, track and analyze audio drama statistics, advertise and market audio dramas, and stream and/or download audio dramas; providing a website featuring on-line non-downloadable software tools for image editing; providing on-line non-downloadable software for online maps; providing technical information updates of industrial process control computer software via the global computer network; providing temporary use of non-downloadable computer software for preparing invoices over computer networks, intranets and the internet; providing temporary use of non-downloadable computer software for preparing shipping documents over computer networks, intranets and the internet; providing temporary use of non-downloadable computer software for shipment processing over computer networks, intranets and the internet; providing temporary use of non-downloadable computer software for tracking documents over computer networks, intranets and the internet; providing temporary use of non-downloadable computer software for tracking

			freight over computer networks, intranets and the internet; providing temporary use of non-downloadable computer software for tracking packages over computer networks, intranets and the internet; providing temporary use of on-line non-downloadable software development tools for online maps; providing temporary use of on-line non-downloadable software for online maps; remote computer network technical monitoring and software maintenance services; rental of application software; rental of computer hardware and computer software; rental of computer software; rental of computer software and programs; rental of computer software, data processing equipment and computer peripheral devices; rental of computers and software; renting computer software; renting out hardware and software; repair of computer software; repair of software; research and development of computer software; research, development, design and upgrading of computer software; software as a service (saas) services featuring online maps ; software as a service (saas) services, namely, hosting software for use by others for use online maps; software authoring; software design and development; technical support services, namely, troubleshooting in the nature of diagnosing computer hardware and software problems; technical support services, namely, troubleshooting of computer software problems; technical support services, namely, troubleshooting of industrial process control computer software problems; up-dating of computer software; updating and design of computer software; updating and maintenance of computer software; updating and rental of software for data processing; updating of computer software for others; updating, design and rental of software
